# Doubling Dominoes

The aim of the game is to add and double your dominoes and get the highest running score.

What you need:
   1. Two or more players.
   2. A set of dominoes.
   3. A score sheet.

Rules for 'Doubling Dominoes' GAME

1. Shuffle the dominoes face down and
    share them out equally amongst the players.

2. Each player turns one of their dominoes over.
      Add the spots on the dominoe and then double this sum.
       Enter your doubled number on the score sheet. Keep adding the doubled sums of the dominoes to
    have a running total.

3. If you get a double dominoe, you can take a bonus dominoe from another player. So now you have
    two dominoes to add, double and enter on the score sheet.

4. The winner is the player who has added and doubled all their dominoes and has the highest score.

Doubling Dominoes Score Sheet example sheet:

Player : Add dominoe	double	Running total
5 + 3 = 8	16	16
0 + 6 = 6	12	28
2 + 2 = 4	8	36
2 + 3 = 5	10	46
