

Traffic Lights

What you need:

1. Two players.
2. A 3 x 3 empty grid
3. 6 red, 6 orange and 6 green counters.
4. The rules

Rules for the Traffic Light GAME

The aim of the game is to be first to complete a row, column or diagonal with the counters of the same colour. For example:

1st player places a red counter on a square.

2nd player can place a red counter on another square or change the 1st players red for an orange counter.

Take turns to place the coloured counters on the squares, remember

- Start with a red counter on an empty square.
- change a red counter already on the board for a orange counter or
- change an orange counter already on the board for a green one.
